Dear Citizens:

The City Council continues to place significant resources toward street improvements. During 2016, the Street Bond Program continued with the reconstruction of North 24th Street. The first phase from Lexington Avenue to Cherry Avenue was completed and the second phase is underway from Cherry Avenue to Elmwood Avenue. Another street project underway is the Roane Road culvert extension. The reconstruction of South 15th Street with a mill and overlay project was completed in 2016. The riprap on the East GW Jackson at Post Oak Creek bridge, which was damaged from the 2015 floods, was also completed.

The Public Works Department continued the street program which is funded by the Street Improvement Fee. Several blocks of streets were overlaid with asphalt. The City spent \$1,511,196 dollars placing 12,786 tons of asphalt on the streets. Some of the streets were:
