

May 2, 2017

Dear Citizens:

Please consider this an update on two important projects that affect the travelling public. The first is the reconstruction of North 24th Street. The second phase of construction is almost complete. The concrete driving surface is being placed as weather permits. The project is scheduled to be complete in December of 2017.

The second is North 13th Street. An aging sewer line has collapsed and will require replacement. This will not be a simple project and will take several weeks to complete. The initial failure has been repaired but the camera shows there are numerous other locations that have the potential to collapse. The decision has been made to keep the street closed to protect the citizens. Please find an alternate route as the street will be closed for a number of weeks.

Sincerely,

Chuck McClanahan
Mayor
