

June 5, 2017

Dear Citizens:

As a reminder, phase three of the reconstruction of 24th Street will begin today. The street will be closed from Hackberry Avenue to 1st Avenue. Local residential traffic will still have access. The project is scheduled to be complete in December of 2017. In addition, the Roane Road culvert is complete and open to traffic.

The North 13th Street at Oaklawn project is progressing. The old sanitary sewer line has been filled with grout and a temporary bypass has been set up so that the street can be opened in the evening. Work is underway to construct the permanent relocation of the line. The street will continue to be closed during the day to provide a safe area for the workers. Hangers have been attached to the bridge and two new manholes have been installed.

Sincerely,

Don Denbow
Mayor
