This report compares the actual pumped figures recorded by the treatment plant master meters to the usage recorded on meters throughout the utility system. Since the meters throughout the system are not read at the same point in time as the treatment plant master meters, consumption is allocated to each month based on the meter reading dates. These figures may be restated from periodically due to billing period allocation or consumption adjustments/corrections.

(1) The Wells Fargo Advantage Funds Heritage Money Market Fund seeks current income while preserving capital and liquidity by investing in high-quality, short-term U.S. dollar-denominated money market instruments of domestic and foreign issuers. The WAL is an average of the final maturities of all securities held in the portfolio, weighted by their percentage of total investments.

(2) TexSTAR is a conservatively managed fund operated in full compliance with the PFIA. The WAM 1 calculation is based on the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This rule specifies that a variable rate instrument to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.

We certify that City funds are maintained in compliance with the City's investment policy strategies and the relevant provisions of the Public Funds Investment Act (Chapter 2256 of the Texas Government Code).
